SUMMARY

Computer Science student focused on AI-powered applications and full-stack development.
Built an autonomous ML platform (AI Trainer) capable of training models using natural language and datasets.
Skilled in React, Next.js, Node.js, and Python with experience building scalable real-world systems.

SKILLS

Languages: Python, JavaScript

Frontend: React.js, Next.js, HTML, CSS

Backend: Node.js, Express.js, FastAPI

Database: SQL, SQLite

AI/ML: Scikit-learn, NLP Basics, Librosa

Tools: Git, GitHub, REST APIs

EXPERIENCE

AI TRAINER (V2) – FULL STACK MACHINE LEARNING PLAT, 03/2026 - Current

Personal Project, Jodhpur, India

- - Built an autonomous AI platform to train machine learning models using natural language prompts or datasets
- - Built multi-modal pipelines for text, image, audio, and regression tasks
- - Used FastAPI and Celery for asynchronous processing and real-time job tracking
- - Implemented model export system and scalable modular architecture

---

ROBOTICS DEVELOPER, 02/2025 - Current

Academic Project, Jodhpur

- Designed robot model and mechanical structure for seed sowing system.
- Built working prototype with Bluetooth control and automation logic.
- Integrated motors, sensors, microcontroller, and power system.
- Tested and optimized for stable movement and accurate seed placement.

AI LAWYER ASSISTANT, 10/2025 - 03/2026

Personal Project, Jodhpur, India

- - Built an AI-powered platform for legal query handling and case suggestions
- - Designed backend APIs and structured data processing system
- - Developed responsive frontend and integrated full-stack functionality

EDUCATION AND TRAINING

Jodhpur Institute of Engineering And Technology (JIET) , *Jodhpur, 09/2024 - current*

B. Tech (Bachelor of Technology) : **Computer Science Engineering (CSE)**

ACCOMPLISHMENTS

- Selected for Offline Round – RECKON 7.0 Hackathon (Team Lead)
- Finalist – Sabka AI Hackathon 2026 (Team Lead)
- Winner – IT Model Making Competition, JIET
- Rank 183 – Unstop Engineering Quiz
